HOW IS THE NATURE OF WORK CHANGING?

Products

WHAT IS WORKWARE?

Interactions

HOW DOES WORKWARE FACILITATE COLLABORATION AND SHARING?

Applications

WHERE DOES WORKWARE WORK BEST?
HOW IS THE NATURE OF WORK CHANGING?
MONITOR MOUNT

• Accommodates single or dual monitors without damaging table surface.
• Designed to work with Haworth Planes® Interior Leg tables or Reside® tables.
FRONT TRIM

- Hides cables and hardware to eliminate clutter.
- Color may be specified in all Haworth paint finishes.
SHROUD

- Conceals the back of the monitor for a cleaner aesthetic.
- Color may be specified in all Haworth paint finishes.
TABLE MOUNT

THREE SIZES
- Accommodates monitors from 40" to 55."
- LED monitors recommended.
WALL MOUNT
LIGHT BLOCK
Conceals the back of the monitor and cables for a cleaner aesthetic.
WALL MOUNT

THREE SIZES
• Accommodates monitors from 40" to 55."
• LED monitors recommended.
WALL MOUNT

SHROUD
- Convenient shelf for reference media and devices.
- Color may be specified in all Haworth paint finishes.
MOUNTING BRACKET

• Mounts to structural walls or Haworth Enclose® wall panels.
• Adjusts vertically in ½" increments.
MOBILE EASEL

VERSATILE
Easily combines with existing furniture by Haworth or others.
MOBILE EASEL

POWERED

- 110 v and USB charging options.
- Convenient shelf creates a handy phone recharging center.
MOBILE EASEL

PORTABLE
Moves between casual areas, formal conference spaces, and anywhere in between.
CONNECTED
Options include digital wired switching, wireless switching, or wireless with wired backup.

AESTHETICS
AESTHETICS

Low profile sliding door complements any surface.
Cables tuck away inside the unit to tame clutter.
AESTHETICS

Can be retrofitted into existing furniture.
We understand that nothing about work today is one size fits all. So workware connect provides scalable options for connecting and sharing.
BASIC WIRED

- Users pass control to share content by passing a cable.
- Plug and play access. No software needed.
Wired with touch control

- Easy switching for up to four users. Simply touch a button on the interface module.
- Plug and play access. No software needed.
- Power relay available for monitor(s).
Wireless

- As secure as the user's network.
- An unlimited number of users on- or off-site can share content using on-screen controls.
- Quad View feature.
- Space design flexibility.
WIRELESS WITH WIRED BACK-UP

- As secure as the user's network.
- Connects an unlimited number of wireless users and up to four wired users.
- Quad View available for wireless users.
- Plug and play access for wired users.
- Power relay available for monitor(s).
A secure and fully supported technology solution, workware is hardware and software that builds on your existing infrastructure.
• Easy connections.
• Self-configures to most laptops, monitors, and mobile devices.
• Upgrades analog and VGA to digital signals; no conversions needed for HDMI.
• Supports unlimited users.
• Quad view allows up to four users to share their screen at the same time.
• Software updates available through haworth.com
MODULAR

- Four sizes (2 wide, 2 narrow) fit most standard rectangular grommets.
- Can be retrofitted into existing furniture.
- Future upgrades are a snap.
• As secure as the user’s wireless network.
• Each session generates a unique 4-digit login code.
• Remote access is one-way (presenter only) to protect against eavesdropping.
Work is an activity, not a place. And increasingly, it’s a group activity. That’s why workware supports various types of group interaction.

**SHARING**
Teams need to be able to share ideas fluidly without interrupting the collaborative process.

**CONNECTING**
As collaboration becomes a given inside organizations, we’re asking more of the tools that keep us connected.

**COMPARING**
Creating together means making comparisons, drawing conclusions, and building consensus.

**SWITCHING**
Presentations are one-sided; collaboration often requires switching back and forth among multiple points of view.
DIGITAL
Because it's fully digital, workware self-configures to practically any device, laptop, or monitor.

REMOTE
Wireless connectivity makes it easy to catch up on progress made by team members who work off site.
REAL TIME
Users in the same room or around the world can connect in real time.

SCALABLE
workware can facilitate face-to-face or remote collaborations with groups of any size.
Comparing

SIDE BY SIDE
Wireless (with Quad View) or wired (with dual monitors) allow side-by-side comparison of data.

TACTICAL
Teams working on tactical objectives and deliverables need to compare notes often.
When teams create together, any contributor may want to take the lead at any time. A touch of a button or a click of a mouse can switch presenters without interrupting the flow of ideas.
TECHNOLOGY ENABLED SPACES

APPLICATION GALLERY
Any space that encourages the use of emerging technologies for a variety of activities, including collaboration, audio/video conferencing, content creation, planning, and data sharing.
